MCD-F500QD
Conveyor Belt Metal Detector
Website: www.mcd168.net

Quantity comes from **MCD** , Honesty shows all the world

Shenzhen MCD Electronics CO.,Ltd

Product Introduction:

1. Dual-loop circuit design, it can detect ferrous and non-ferrous and other metal objects, the sensitivity can be adjusted separately, with memory function can be stored 10 kinds of test material.
2. Detector with audible and visual alarm, and automatically exclude, stop, rewind
3. functions, user-friendly menu, easy to operate touch screen. Machine made of stainless steel, anti-corrosion, no rust, easy to clean up.
4. Conveyor and pallet assembly used in the U.S. "FDA" standards of white non-toxic materials.
5. Detection accuracy over the corresponding provisions of HACCP system Detect indicators.

Product Parameters:

1. Detecting Method: Magnetic induction detection
2. Display way: 6 inches of digital circuit touch blue LCD display
3. Detecting width: 40-120CM
4. Detecting height: 10-50CM
5. Sensitivity adjustable: 1-10 Level
6. Detecting Sensitivity: $\Phi 0.8\text{mm}-3.0\text{mm}$ (Fe) $\Phi 1.5\text{mm}-5.0\text{mm}$ (SUS)
7. Alarm Method: Buzzer alarm and motor automatically stop
8. Conveyor Belt Speed: 25m/min
9. Power: AC100-265V, 50-60Hz
10. Size: (150-170)cm(L)*(80-90)cm(W)*(85-120)cm(H)
(Demand can be do as request)

Feature and Application:

Making the outside shape beautiful and makes the weight of the machine light to adopt the ABS shell of good quality ; Equipped with the auto-alarm and Auto-return device ; it is featured by powerful by powerful anti-magnetic Disturbance capability , high reliability and sensitivity . Be used in food , Medicine ,and toys detector of metal inside
