7. Packing bag

### 2. Installing Instruction:

1. Install mirror and aluminum tube as picture show well.

2. Connect aluminum tube, and fixed well

3. If the light is dark, please install the LED torch, cooperate to use.

### 4. Application

The handle of the search mirror is made of aluminum alloy, which is light and high-strength, and is capable of long-time work, suitable for police and security department concealed search. The telescopic handle increases the flexibility of the search mirror in all kinds of using environments. The handle can be telescoped rapidly when it is not needed and can be extended when it is to be used. It's no need to bend down when performing the inspection.
